PROFESSIONAL SUMMARY:

SENIOR JAVA FULL STACK ENGINEER | BACKEND ARCHITECTURE SPECIALIST

Strategic Senior Software Engineer with 12+ years of experience in designing, architecting, and delivering enterprise-scale, cloud-native applications. Expertise in Java ecosystem (17/21 LTS), Spring Boot 3.x, and Microservices, with a proven track record of scaling distributed systems using Kafka, Redis, and MongoDB. Full-stack proficient with deep expertise in Java backend specialization and modern React.js frontend integration. Recognized for reducing infrastructure costs by 25% and maintaining 99.9% uptime for high-volume, business-critical payment engines. Adept at driving and mentoring cross-functional teams of 5+ engineers in Agile environments to drive engineering governance and high-performance software delivery.

CORE SKILLS:

- **Core Backend & Architecture:** Java 17/21 LTS, Spring Boot 3.x, Microservices Architecture, RESTful APIs, API Gateway integration, OAuth2/JWT-based security, Spring Security, JPA/Hibernate, Multithreading, Design Patterns, Resilience Patterns, Distributed Transactions, Saga Pattern, Event-Driven Architecture, and System Integration.
- **Full-Stack Collaboration & Integration:** Architecting API contracts for React.js frontends, ensuring end-to-end application flow, and managing modernization.
- **Messaging & Data Management:** Apache Kafka, MQ, Redis Caching Strategies, Async Processing, MongoDB, Oracle, MySQL, PostgreSQL, Query Optimization, and CAP Theorem trade-off awareness in distributed systems.
- **Cloud & DevOps:** AWS, OpenShift (OCP), PCF, Docker, Kubernetes, Git/GitHub, Jenkins CI/CD Pipelines, Maven/Gradle, SonarQube, and Nexus/JFrog.
- **Testing & Observability:** Selenium, JUnit, Mockito, TestNG, TDD, Splunk, AppDynamics, and Distributed Tracing.
- **Team Guidance/Leadership & Strategy:** Agile/Scrum, Team Guidance/TL (5+ Engineers), Legacy-to-Cloud Migration, Cloud Modernization, and Engineering Governance.

EXPERIENCE SUMMARY

WELLS FARGO

AUG 2021 - Present

Senior Software Engineer

- Designed and developed distributed microservices using Java 17, Spring Boot 3.x, Kafka, Redis, and MongoDB, implementing Event-Driven Architecture, Saga Pattern for distributed transactions, processing 400 TPS with high availability and fault tolerance patterns.
- Spearheaded the successful migration of critical applications to OpenShift Cloud (OCP), resulting in a 25% reduction in infrastructure costs and improved application uptime to 99.9%.
- Led the successful migration of the Fed Funds application to the latest WF-RIA3 framework leveraging React.js, delivering results within challenging deadlines.
- Acted as a Team Lead, mentoring and coaching team of 5+ engineers while driving adoption of Agile best practices, peer code reviews, and CI/CD pipelines across teams, improving code quality and cutting post-release defects by 25%.

DBS TECH

2017 - 2021

Software Engineer

- Modernized legacy systems using **React.js and Spring Boot**, improving performance by 45%.
- Developed and optimized application modules with a focus on performance and scalability.
- Contributed to the development of advanced application features by writing clean, maintainable code, improving code review turnaround by 30%.
- Implemented SonarQube compliance across all modules, increasing code quality scores by 40% and cutting technical debt by 20%. Authored detailed test case documentation and actively collaborated with senior developers to adopt best practices.
- Ensured high-quality sprint deliveries aligned with Agile practices, reducing production defects by 30% and consistently meeting stakeholder commitments.

EDUCATION:

- Bachelor of Technology (Electronics & Communication Engineering) | Mahaveer Institute of Science & Technology, JNTU - Hyderabad | 2008 - 2012
- MBA in Operations from IGNOU, Hyderabad.

ADDITIONAL INFORMATION:

- Team Guidance & Mentoring – Guided and coached 5+ engineers, ensuring adoption of coding best practices, design patterns, and quality standards.
- Training & Upskilling – Organized knowledge-sharing sessions and upskilled team in new technologies (Java 21, Kafka, MongoDB, AI/Gen AI).
- Sprint & Delivery Coordination – Oversaw Agile ceremonies (planning, retrospectives, stand-ups) ensuring timely and quality deliverables.
